WORK EXPERIENCE

Bank of Baroda, Mumbai, India

Assistant Vice President (on contract basis), IT Department

Jul. 2025 – Mar. 2026

QA/Cloud Engineer

- Develop QA features for deployed cloud apps & manage/maintain them including platform infrastructure

Deutsche India Pvt. Ltd., Bengaluru, India

Assistant Vice President, Trade Finance & Lending

Aug. 2023 – Mar. 2025

Senior Engineer

- Build features & fix errors using defect trackers for next-gen (TFL5) financial product platform enabled autobahn app for collateral hedge deal calculation tool microservice
- Build & support HA (highly-available) scalable cloud native microservice component platform services for TFL5 apps, and extend parser definitions for encoded high-level Domain-Specific language (DSL) rule engine

Dell Technologies Inc., Remote

Software Senior Engineer

Mar. 2021 – Aug. 2022

Backend/Microservice developer

- Build HA scalable microservice components for Dell's next generation Datacenter infrastructure manageability solution, **OpenManage Enterprise - Modular** using state of the art software tools
- Resolve errors on customer deployed solutions with team of developers & multi-level support team to provide runtime fix
- Develop features & maintain HA scalable instance of database microservice of datacenter manageability solution

Wissen Technology, Bengaluru, India

Senior Software Engineer

Sep. 2017 – Jul. 2018

Backend/Microservice developer

- Develop scalable data pipelines and concurrent execution engine using Java 8 stream and concurrency interfaces on SpringBoot runtime for ETL datasource feeds to analytics engine
- Incorporate temporal database implementation to facilitate timestamped data updates

Samsung Research Institute Bengaluru, Bengaluru, India

Lead Engineer

Sep. 2015 – Aug. 2017

Full Stack developer

- Develop UI builder based data binding extension to SDK tools for Tizen ecosystem bundled as **Tizen Studio** for Tizen App development & Prototype web-IDE using node.js stack based **Eclipse Orion** umbrella architecture for web based IDEs

Hewlett Packard India Software Operations, Bengaluru, India

System Software Engineer

Aug. 2012 – Sep. 2015

Full Stack developer

- Develop extensions to **HPE OneView** datacenter management appliance base OS and component services such as networking, system upgrade, backup/restore and system settings to field them as RESTful services
- Interact and integrate with Linux clustering utility (**DRBD & Pacemaker**) to achieve standby highly-availability of node's RESTful services & Extend CGI endpoint using python WSGI for critical services' contingency

EDUCATION

University of Florida — Herbert Wertheim College of Engineering, Gainesville, FL

MS in Computer & Information Science Engineering

Aug. 2018 – Dec. 2020

National Institute of Technology Durgapur, Durgapur, India

Bachelors of Technology in Information Technology

Aug. 2008 – Apr. 2012

SKILLS : PROGRAMMING LANGUAGES AND TOOLS

Programming languages: Java functional programming, Python, C/C++, JavaScript, Typescript, Shell Script, Elixir/OTP

Database: Oracle, PostgreSQL, IBM DB2, MongoDB

Frameworks: Spring boot, ETL, Hibernate, Erlang/OTP, NodeJS, Underscore, ReactJS, RequireJs, Web runtime Service workers, Flask, Django web framework, Jupyter notebook

Testing Frameworks: Junit, Selenium based BDD testing tools

Build Tools: Maven, Gradle

FIELDS OF INTEREST

- Design and develop scalable microservice architecture based enterprise ready products
- Develop expertise in building financial software implementations
- Learn and develop blockchain & ML based applications
